

REIMAGINE

the way you work

and keep your business secure with Windows 11

Upgrade Your Devices

Adoption of Windows 11 Keeps Your Business Safe

Your business can't afford to stay behind when Windows 10 reaches the end of support in October 2025, because that would mean submitting to the inevitability of very successful hacker attacks, downtime, and all the horrors that come with it. Windows 11 is the modern security standard for Microsoft's OS and features:

Futuristic Security

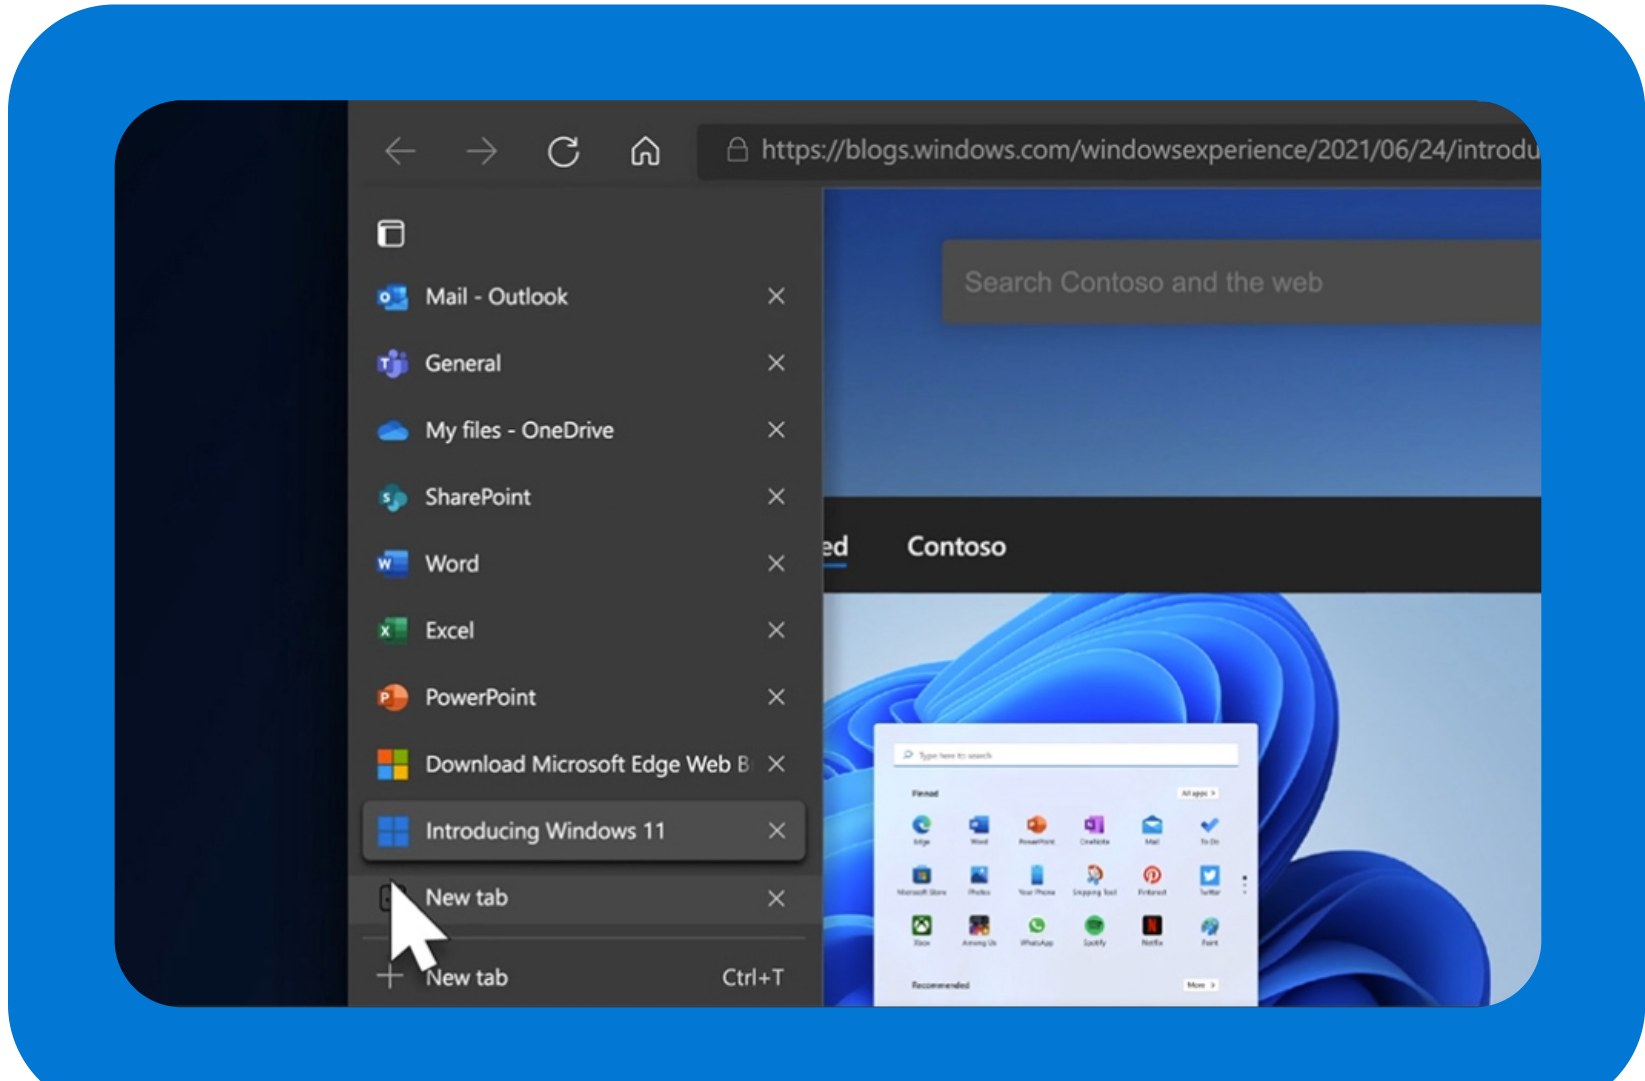

Protecting your "access from anywhere" data with Windows 11 built-in security, hardware-based isolation, encryption, and malware protection.

Modern IT Management

Streamlining security management throughout various digital infrastructures while extending that management to the cloud—now your IT can protect devices, data, apps, identities, and more, anywhere.

Work Evolved

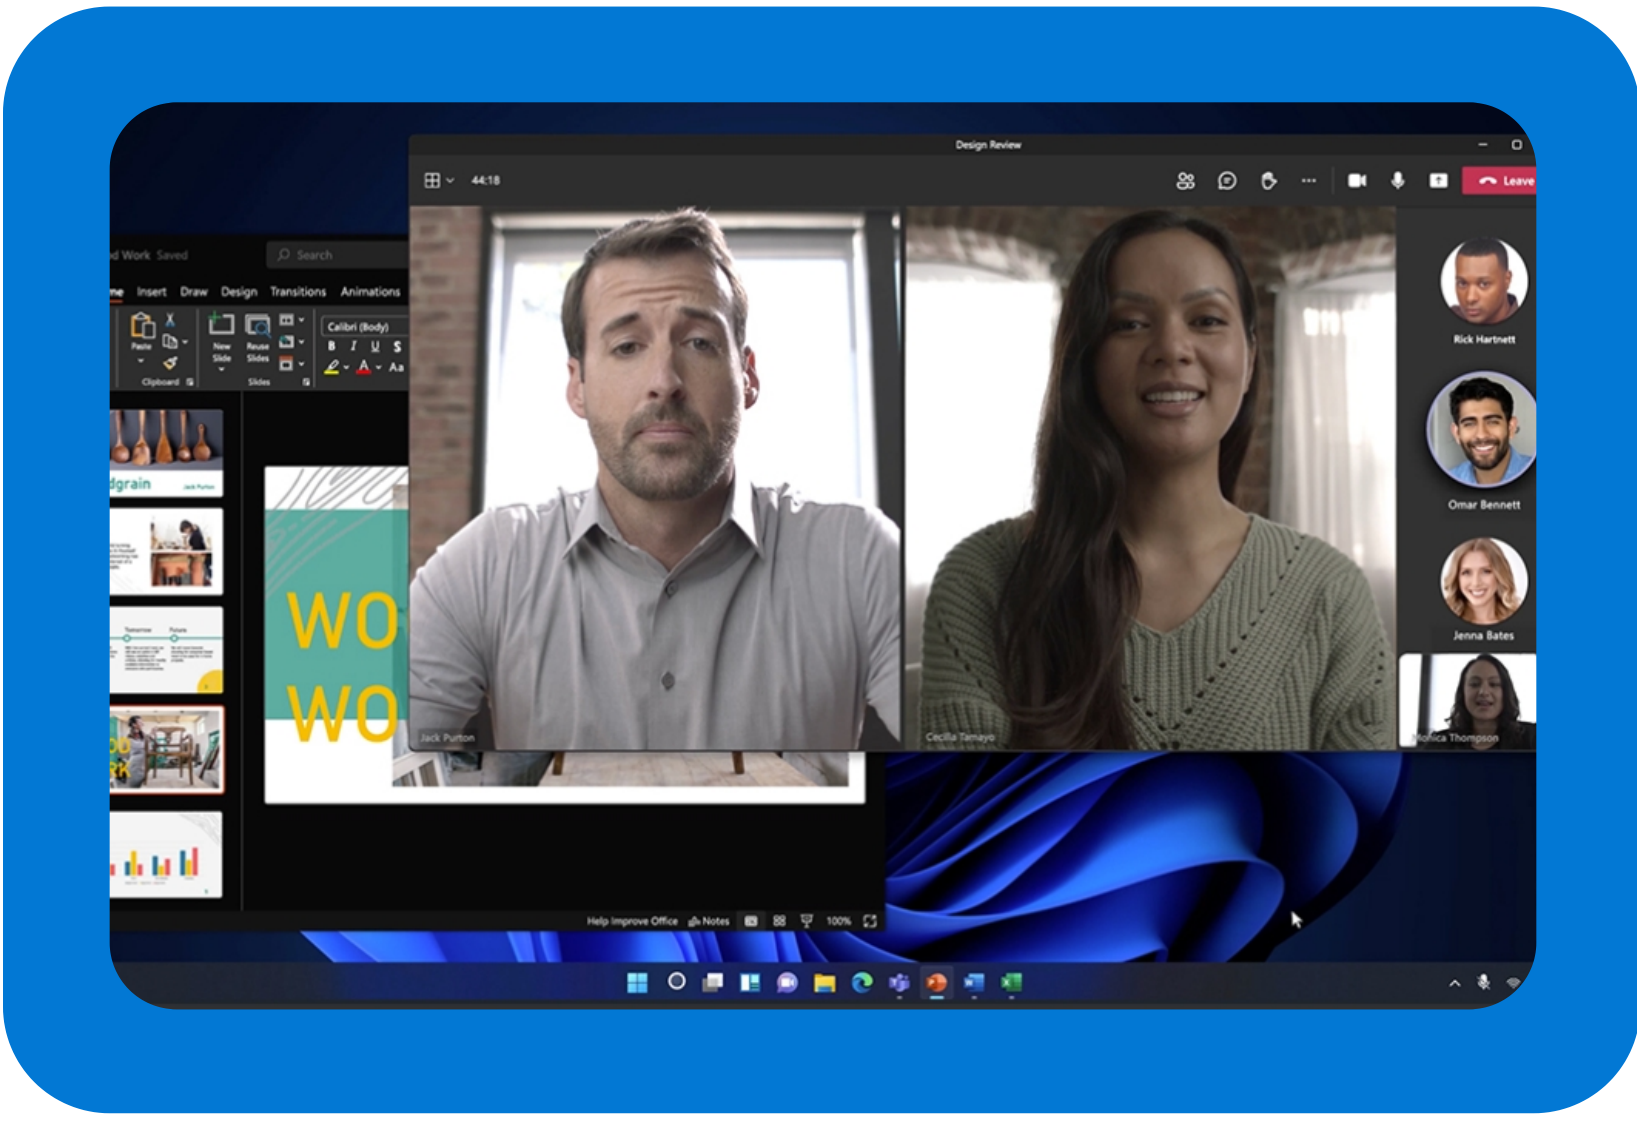

Enhance employee productivity through personalized experiences and smarter videoconferencing, never seen in previous versions of the operating system.

Upgrade to Windows 11 devices now!

Windows 11 Pro Devices

Whether you're looking for a full or partial refresh for your team's hardware, Windows 11 Pro Devices are the ideal upgrade that take full advantage of everything Windows 11 has to offer, including:

Overall better experience

that's modernized for the future of business.

Performance and stability

that's quicker, and more efficient than Windows 10.

Security enhancements

against viruses, malware, and RAT software that will disrupt your business.

Compatibility

with new and existing hardware and software that continues support beyond 2025.

Did You Know?

FASTER

Windows 11 wakes from sleep 25% faster than Windows 10.

FUNCTION

Memory management built into Windows 11 favors the apps you are using; this means they'll get more CPU power over other system resources.

POWER

Optimizations in Windows 11 help it run faster on devices with lesser components.

Hidden Gems of Windows 11

Unlocking the most out of your Windows 11 experience is easier than you might expect. So many of its features are streamlined to the point of seamless integration. You might not have known about the hidden gems of this OS, but as you utilize them, you'll quickly ask yourself how you ever lived without them.

Snap Layouts

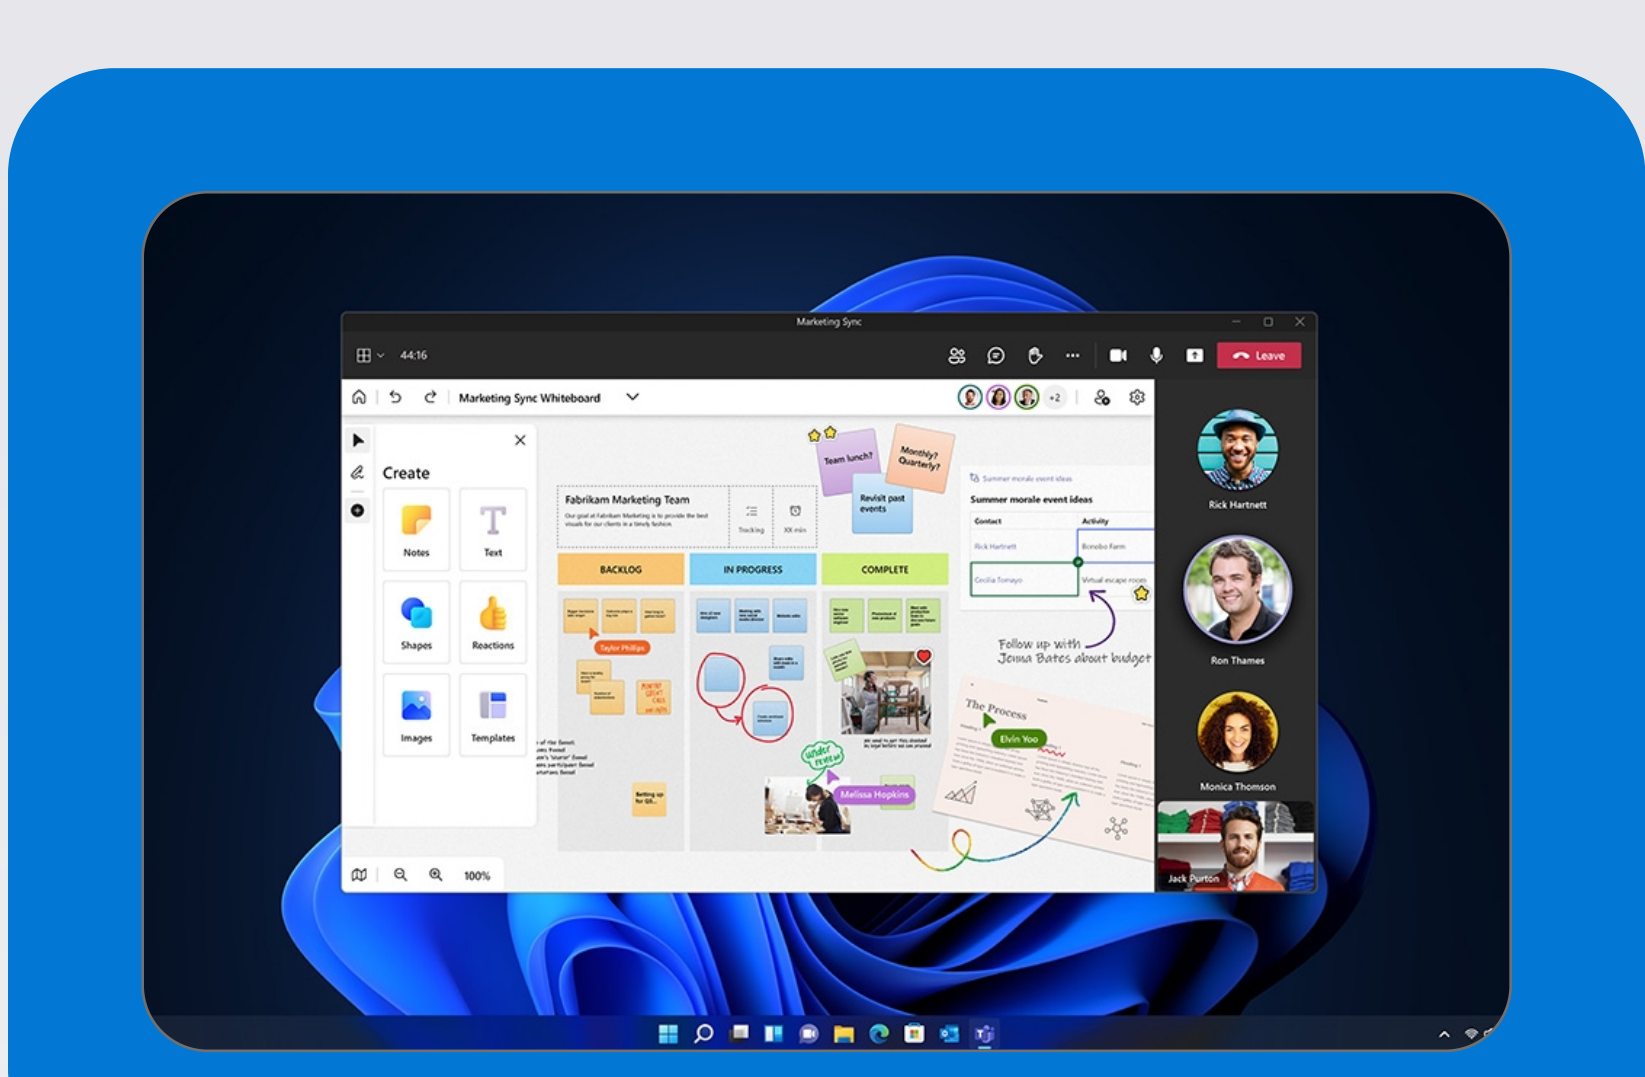

Many features that will streamline your work will not be backported to Windows 10, like the incredible multitasking and system performance with Snap Layouts. This feature is great for grouping your windows to the taskbar while giving you access to many configurations for your personal needs.

Smart Setup

Many businesses require multi-monitor setups, and Windows 11 recognizes that. Remembering how apps are configured on your external monitor, Windows 11 will save them in that state.

Collaboration Features

Perform much better with Windows 11, plus, there's inclusions exclusive to this OS, including, background blur, eye contact adjustments for meetings, and automatic framing.

Concierge Services – Get My Business Windows 11 Ready!

Sometimes your business just doesn't have the time to properly prepare. Unfortunately, this can lead to harmful consequences and downtime in the future. However, we're here to help.

During OS transition, you need to locate the most critical areas of your IT estate that require replacement. Ultimately, this will help you determine which machines can upgrade to Windows 11 while creating growth opportunities for Windows 11 Pro Devices.

Ask yourself...

- Are my operating systems up to date with the latest software and patches installed?
- When was the last audit to determine if end users are using single passwords for multiple accounts?
- Do we have two-factor authentication for outside party protection?
- Have we clearly defined policies across our teams for personal device use and implemented restrictions for public networks?
- When was our last employee training session for cybersecurity awareness?

If you don't have the time to adapt now and ensure the proper preparation has been given for the future success of your business, contact us to learn about our custom solutions that will upgrade your business with Windows 11 ready hardware, software, and services today.
